

OPEN SEMINAR

Studying in Germany

WHEN: 23/03/2011 – 19h às 21h

WHERE: Auditório de Química (ao lado do RU)

TARGET AUDIENCE: People interested in studying in Germany

Dr. Isabel Heller (DAAD) / Dr. Chantal Weber

There are different ways to go for studies to Germany. Whether you go as exchange student, free mover or research student, where you go and how long depend on your personal interests.

In this lecture we will introduce to you these different possibilities. Studying abroad is a big challenge, but it's worth it. What you should check out, which questions you should ask yourself, what kind of preparation should be done and how long does it take; these are questions we want to discuss with you.

One of the big problems which international students are facing is the funding. Therefore, Isabel Heller, local representative of the DAAD in Curitiba, will give an overview on the DAAD scholarship possibilities and how to apply to it. The DAAD is the biggest funding organization in Germany. It provides among others scholarship for international students and PhD candidates.
